

Dear Commissioner Anglin,

KayLee Wood my wife has discussed with our neighbors, Cody and Heather Salverino, regarding the movement of the culvert that is North of our house and directly in front of the front door of our house. We proposed to them that we change the direction of the discharge side of the culvert to be angled East towards the area directly between our two properties. They agree that this is the right choice for the drainage to not flood our house and would cause minimal disruption to their property. Please proceed with the construction of moving the culvert to aid in the drainage of our property.
